Interest Rate Increase

Where a loan is obtained by an employee from his employer and either no interest is payable or the interest payable is less than the “official rate of interest”, the difference between the amounts calculated at the official rate of interest, and the amount calculated at the interest rate applied by the employer, is a taxable fringe benefit. The fringe benefit value must be processed in the payroll and reported on the tax certificate against the general fringe benefits IRPS code 3801.

The “official rate of interest” is defined in section 1(1) of the Income Tax Act as the rate of interest that is equal to the RSA repurchase rate (“repo rate”) plus 100 basis points (1%). The official rate of interest changes from the first day of the month following the date on which the repo rate change comes into effect.

The repo rate has increased from 7% to 7.25% on 27 January 2023, therefore, the official interest rate has increased to 8.25% effective 1 February 2023.

Paymaster Impact

- The new interest rate has been implemented on the system effective 01 February 2023.
- Customers with the "Loan Deduction Fringe Benefit" component have been recalculated.
- No other statutory changes have been announced.
